Response Rate: 4/7 (57.14 %)

1 - The responses to the questions below will be used by your instructor to understandopportunities to improve this course for students who take it in the future.

The course materials (textbooks, access codes, online resources, reading packets, etc.) were useful in supporting my learning.

Response Option	Weight	Frequency	Percent	Percent Responses	Means
Very much	(4)	2	50.00%		3.25
Quite a Bit	(3)	1	25.00%		
Some	(2)	1	25.00%		
Very Little	(1)	0	0.00%		

0 25 50 100 Question

Response Rate	Mean	STD	Median
4/7 (57.14%)	3.25	0.96	3.50

2 - Please identify what you consider to be the strengths of the course.

Response Rate	4/7 (57.14%)

- The teacher taught Statistics well and helped me when I asked for it. The videos helped me understand the content.
- Everything was nicely organized, and the assessments made sense and were not hard to find
- A strength was the course flexibility. The instructor was very good about being patient.
- The notebook examples and slides were very informative. The instructor is knowledgeable in his field and responds to questions.

3 - How did the assignments, class discussions, learning activities, and other parts of the coursehelp you learn the course content?

Response Rate	4/7 (57.14%)

- The assignments, class discussions, and other parts of the coursehelp helped me practice the core parts of Machine Learning through repetition.
- The assessments and class discussions help me understand everything and make sure I am not confused
- Course materials were helpful but sometimes confusing if information was current.
- I learned what the purpose of different types of algorithms are for when building models, training testing splitting, and evaluating them as well as data exploration.

4 - Please identify areas where you think the course could be improved.

Response Rate	4/7 (57.14%)

- add more practice sections. But other than that, it is perfect.
- Nothing was not needed impoved it all made sense
- Updated slides
- I feel like we should have textbooks, and Google colab pro instead of Jupyter notebooks because it is a hybrid course and some notebooks only work with a set environment at a desktop to run them.

5 - What advice would you give to another student who is considering taking this course?

Response Rate	4/7 (57.14%)

- Take your time and study. Do not rush.
- Make sure to keep up to date on assignments and ask questions
- Make sure that you keep up with the assignments.
- You will learn if you really want to, otherwise you will pass but you won't stand out amongst employers.

2 - Please identify what you consider to be the strengths of the course.

Response Rate	7/17 (41.18%)

- When the teacher breathes oxygen to fuel your fire it becomes invigorating. Not only did this course peek my curiosity he was also able to answer ANY question outside of this course. The amount of information and education presented through our academic professors and leaders is something to behold. If the plaque's, diplomas and awards were not enough. They showcase how much they know not only by knowing the material front to back but being able to explain it in a way that's easily conveyed and understood is an achievement in and of itself. While this isn't the typical 'hold your hand' kind of course, it becomes limitless! Ask any and all questions and watch the answer they give you blossom 4 more questions! Extremely thorough class, equipping me with the computer science essentials to be confident in my academic pursuits.
- The course works well in a way to help you build off what you've learned prior
- All the materials for the class was very helpful, and really helped me understand our assignments for the week.
- Practice on GitHub each week.
- The biggest strengths of this course were the self-paced work. Instead of a bunch of due dates, you could generally do assignments at your own pace as long as they were done before a mini-portfolio review. These reviews were also really good, as they allowed direct questions and tested your knowledge directly.
- Professor was very knowledgeable and engaged very often with me to help with any questions I had.
- I liked the github assignments

3 - How did the assignments, class discussions, learning activities, and other parts of the coursehelp you learn the course content?

Response Rate	7/17 (41.18%)

- Love, love, love how this class was structured. Made it easy to retain the information while not overwhelming you. Biting off the recommended modules for the week helped maintain retention and overall understanding of the course. A portfolio is essential for those individuals planning to further their career in this field, the professor's structure for this class has managed to take advantage of that exact necessity in this course.
- for me, personally they helped me with understanding the logic when I got stuck.
- I could be happier with the assignments and disussions, and activites helped me learn. The dicussions were short but so much good informatain is presented.
- All of the practice was a great way for me to use what I learned and expand on it.
- The assignments forced me to engage with the material in a way I wouldn't have otherwise, setting me up for the next classes.
- They helped me study and learn more.
- it helped a lot

4 - Please identify areas where you think the course could be improved.

Response Rate	7/17 (41.18%)

- Maybe the first initial day could be in class to help everyone understand Github, that was arguably the hardest learning curve in all this.
- there's two modules, the advanced lists and the dictionaries ones that I think could be earlier in the class
- I cannot think of any at the moment.
- Nothing.
- I think more side coding assignments to shore up the knowledge in the course would be greatly effective.
- I think more videos would be helpful.
- I am unsure, I liked how everything was

Instructor: Trevor Swarm *

Response Rate: 7/17 (41.18 %)

5 - What advice would you give to another student who is considering taking this course?

Response Rate	7/17 (41.18%)

- The most qualified individual for the job you will come across! Helpful, insightful and informative. A professor who welcomes curiosity and questions is someone that you really want to learn from, especially if they know most of the answers! The course itself is very straightforward, but make sure to keep up with the pacing in place! The professor of this course cares dearly about the information in it and how its being taught, although the entire class is online. I would highly recommend at least showing face to the professor and detailing your interests and your major. Creating that human connection really helped the teacher/student relationship because it was established in person, not on a screen!
- it's a good class to take, don't overthink everything and you should be fine
- Definitely take the class, but stay humble and work hard.
- As someone who had never took a coding class before it was a bit difficult so maybe having some prior knowledge.
- The best thing to do is ask questions whenever you have troubles as they always help make an effective understanding.
- Study and watch videos outside of class.
- Do the work

14 - What aspects of this course contributed most to your learning?	
Response Rate	7/17 (41.18%)

- The course book is honestly a great resource for understanding and even though it is online, I still took physical notes. Retaining this information is imperative for those going into Computer Science. Don't shoot yourself in the foot by skimping out on the foundations of what you should know!
- The mini portfolio reviews helped me understand things in a different way. if I was overthinking something before, the reviews helped me put things into a different perspective
- Discussions, exercises, and opportunities to test my understanding kept me engaged and allowed me to learn through doing rather than just observing.
- All of the practice.
- The hands-on coding work.
- The instructor's videos helped.
- I liked the hands on-ness of github

Course: COSC203050026/SP: COSC 2030 500 Computer Science II 26/SP-Computer Science II: COSC 2030 500

Instructor: Trevor Swarm *

Response Rate: 3/5 (60.00 %)

1 - The responses to the questions below will be used by your instructor to understandopportunities to improve this course for students who take it in the future.

The course materials (textbooks, access codes, online resources, reading packets, etc.) were useful in supporting my learning.

Response Option	Weight	Frequency	Percent	Percent Responses	Means
Very much	(4)	2	66.67%		3.33
Quite a Bit	(3)	0	0.00%		
Some	(2)	1	33.33%		
Very Little	(1)	0	0.00%		

Response Rate	Mean	STD	Median
3/5 (60.00%)	3.33	1.15	4.00

2 - Please identify what you consider to be the strengths of the course.

Response Rate	3/5 (60%)

- Ability to work independently but have help if needed.
- This course has a strong grounding in the communication between the professor and students. He is very responsive and has a very strong understanding of the material making it helpful to learn from him.
- The course was easier to learn than I thought, and using those lectures to make code seemed a lot easier if you understand the concepts.

3 - How did the assignments, class discussions, learning activities, and other parts of the coursehelp you learn the course content?

Response Rate	3/5 (60%)

- Assignments were actual problems to be solved not just checking a box for a new concept.
- The assignments were engaging and interactive. They were strong but not overbearing making it fun and exciting to learn new things.
- It helped me learn how to code further, and made me learn on how that code works.

4 - Please identify areas where you think the course could be improved.

Response Rate	3/5 (60%)

- Guided learnings arent the best.
- There are not many areas where the course could be improved besides being able to turn in assignments using a dedicated IDE. GitHub is a great platform for collaboration and communication but for someone new to computer sciences it can be daunting to use.
- I do wish the final project idea was a bit more changed from last time.

5 - What advice would you give to another student who is considering taking this course?

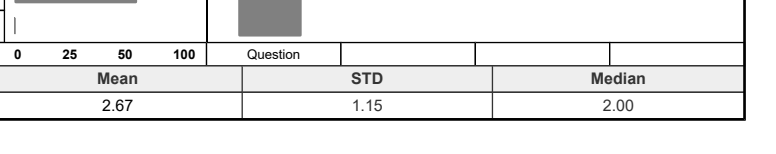

Response Rate	3/5 (60%)

- Make sure you understand core concepts early.
- Take your time to learn and understand. Practice is what makes perfect because in the end computer science is the study of computer language.
- Make sure to take notes before you do a mini portfolio for every assignment you do prior to it. Your instructor will thank you.

6 - During this academic term, how much has this course emphasized the following mental activities?*

Memorizing facts, ideas, or methods from your class and readings so that you can repeat them in pretty much the same form*

Response Option	Weight	Frequency	Percent	Percent Responses	Means
Very much	(4)	1	33.33%		2.67

LARAMIE COUNTY COMMUNITY COLLEGE
Cheyenne | Laramie | Online

Course: COSC240950026/SP: COSC 2409 500 Programming 26/SP-Programming: COSC 2409 500

Instructor: Trevor Swarm *

Response Rate: 8/13 (61.54 %)

1 - The responses to the questions below will be used by your instructor to understandopportunities to improve this course for students who take it in the future.

The course materials (textbooks, access codes, online resources, reading packets, etc.) were useful in supporting my learning.

Response Option	Weight	Frequency	Percent	Percent Responses	Means
Very much	(4)	6	75.00%		3.50
Quite a Bit	(3)	0	0.00%		
Some	(2)	2	25.00%		
Very Little	(1)	0	0.00%		

Response Rate	Mean	STD	Median
8/13 (61.54%)	3.50	0.93	4.00

2 - Please identify what you consider to be the strengths of the course.

Response Rate	8/13 (61.54%)

- I love how Mr.Swarm helped me to get through the class especially with some of the GitHub classroom assignments and being patient with me when I was having issues with tech
- The assignments were very intuitive. The structure of the course was really good as well.
- The guided learning and projects.
- There are many strengths to this course, but the biggest one that comes to my mind is how helpful the professor is. We have had a lot of technical issues in this class, but instead of it being hard to manage, the professor was there to assist in any way.
- The Zybooks materials helped the lessons feel more hands-on.
- I liked the projects
- It was hands on and helped improve my python through actual code instead of reading texts.
- The instructor was easy to contact and work with.

3 - How did the assignments, class discussions, learning activities, and other parts of the coursehelp you learn the course content?

Response Rate	8/13 (61.54%)

- The discussions helped me get new views on how to code and understand different concepts, the zybook even though it was quite tedious but I liked the hands on experience
- The discussions helped me organize my thought as it forced me to explain each concepts that we learned that week.
- Yes teacher was very helpful with videos and tutorials.
- The guided learning we did helped teach us how to write the code we were using and how it works. The discussions really helped us also understand how the code works and why we use it. The projects allowed us to put the code into practice.
- They helped me learn it and practice it.
- I think it helped mostly
- It helped solidify the things I learned by forcing me to apply it.
- The class weekly chapter assignments helped me learn the course but became daunting at some times.

4 - Please identify areas where you think the course could be improved.

Response Rate	8/13 (61.54%)

- Some of the links do need to be updated
- I am not a fan of the zybooks .
- Assignments to be graded sooner.
- The only thing that I can think of is the technical issues with the GitHub website.
- I think the course started off a little overwhelming, I think a simple intro module would have been helpful.
- I wish instead of the ZyBooks, there was smaller GitHub projects like in intro to Computer Science
- I feel the GitHub was buggy at times.
- The course could become more interactive in a lab space or with larger projects.

Instructor: Trevor Swarm *

Response Rate: 8/13 (61.54 %)

5 - What advice would you give to another student who is considering taking this course?

Response Rate	8/13 (61.54%)

- Have a good knowledge of GitHub
- Watch all of the videos and start assignments early.
- Take it! The class is amazing, and the teacher is very helpful!
- I would tell them to reach out to the professor with any issues they may have, because the instructor has a great response time and is willing to help out with anything.
- Watch YouTube videos outside of the course materials and practice coding and understanding the course material early on.
- Focus on the projects
- Make sure to understand what you're doing instead of just vibe coding it all the way.
- To keep up with the weekly assignments to learn important topics that will be covered throughout the larger projects.

6 - During this academic term, how much has this course emphasized the following mental activities?*

Memorizing facts, ideas, or methods from your class and readings so that you can repeat them in pretty much the same form*

14 - What aspects of this course contributed most to your learning?	
Response Rate	8/13 (61.54%)

- The teacher him self
- I lecture videos.
- The videos
- The biggest aspect that contributed to my learning was not only the Guided Learning that we did to learn the code, but the instructors involvement with the students was very useful. He encouraged anyone who needed help to reach out to him, and he was very helpful in assisting. I reached out one time outside of typical work/office hours, and he responded to me within minutes. I was very grateful for his assistance this semester.
- The videos provided as well as the ZyBooks materials.
- The projects
- The hands on learning
- The weekly chapter assignments.
